

SMART HYGIENE POINT

Digital Signage and Disinfectant

TOCHI SMART HYGIENE POINT (SMART HYGIENE POINT)

With the new coronavirus epidemic, various studies have been initiated in order to secure people in all companies and business areas, public areas.

Wireless digital screen and hand disinfectant dispenser is a device that can display advertisement contents, desired photos or videos and distribute the disinfectant automatically at the same time. Compared with the traditional digital display concept, this smart device aims to capture more target audience.

TOCHI led digital hand sanitizer dispensers 15.6 - 21.5 - 32 inch wireless;

- Footed
- Hanging
- Wall Mounted

In this sense, it will make your life easier and create awareness with its models.

As Erpa Teknoloji, we have recreated a specially designed new led digital screen and hand disinfectant kiosk that distributes 99.99% germicidal disinfectant gel. You can use Tochi led digital display and hand disinfectant dispenser, which is one of our solutions that keep pace with the new lifestyle, with its 4 different options, by mounting it on the wall as well as standing.

1- Dispenser + Screen

Information screen, video and image playback + Disinfectant

2- Dispenser + Screen + Fever Meter

Information display, video and image playback + Disinfectant + Fever Meter (Infrared fever measurement system)

3- Dispenser + Screen + Camera

Information screen, video and image playback + Camera (Used for face recognition and personnel switching)

4- Dispenser + Screen + Camera + Fever Meter

It is the full package of TOCHI Digital Signage and Dispenser. All features are available.

PUBLIC AND ORGANIZATIONS AND COMPANIES

Models suitable for use for public institutions and companies. It can be used in the elevator and waiting areas. It is used with the thermometer option at the entrances.

SHOPPING MALLS

It is preferred in the common areas of shopping centers. Entry can be controlled with the thermometer option at store entrances. You can take measures by measuring with the Thermal Camera in 1 second at the shopping mall entrances.

MARKETS

It is designed for the most crowded region markets today. It can be used with the thermometer at the entrances, as well as the disinfectant model at the check-outs or fruit and vegetable departments. In addition, thanks to the Digital Signage screen, you can use software that shows the number of people in the market.

HOSPITALS

Hospital visits became much more risky during the Covid-19 process. With the fever meter used at the entrances, you can reduce the risk of spreading the disease with the disinfectant you can use in the corridors of the hospitals and in the lobby.

GYMS

Perfect for gyms from risky areas after coronavirus

one product. Campaign shares

In addition to the screen you can make, you can provide a hygienic environment for your customers who use common appliances.

COMMON TOILETS

With the Smart Hygiene Point for common toilets used in areas such as shopping malls, plazas and public institutions, you can minimize risks. Fan Drying, Paper towel and Disinfectant options are available.
